25X1

2. Coordination of NIE's at the Deputy level in advance of consideration by the IAC
- a. It was the consensus that no new group (the Deputies) would be called upon to meet on estimates after these had cleared the IAC representatives.
 - b. Added emphasis will be put on the "clean-up" session of the IAC representatives. In preparation for the clean-up session, the representatives will make every effort to get the views of their principals, additional time being allowed for this whenever possible.
 - c. The practice of including footnotes to record views of IAC representatives at variance with the text of an estimate is to be encouraged in order to minimize the circulation of comment at the IAC meeting.

3. Inclusion of a coordination note (credit line) on the cover of NIE's; and modification of present note to reflect role of non-participating members (FBI and AEC)
 - a. The service agencies did not feel strongly one way or the other about carrying a "credit line" on the cover in lieu of or in addition to the one carried on the title page. State felt it was desirable primarily as a means of informing consumers on which agencies constituted the IAC.
 - b. O/NE undertook to circulate a proof of a cover containing a modified note to ascertain more definitely the view of the agencies.
